

## Incident Readiness Pack

**Our Incident Readiness Pack is a suite of complimentary solutions that are designed to assess and improve your organisations' ability to respond to Cyber incidents in a harmonised and controlled manner.**

- Incident Response Plans form the basis of your organisational response to all types of cyber incidents. Undertaking an expert review of those plans is crucial to ensuring your plans are fit for purpose against the backdrop of the modern threat landscape.

Tabletop exercises allow your teams to test their understanding of your newly reviewed and improved Incident Response plans, as well as their ability to work together across disciplines – both internally and externally.

The combination of these services not only provides your teams with tested and well-understood processes, but also provides demonstrable outputs to show improvement in Incident Response capabilities as an organisation.

### Incident Response Plan Review

Having an external review of your plan and supporting documentation provides reassurance to all key stakeholders that the business is in the best possible position to respond to an incident.

Through interviews, group sessions, and document-based evidence we will review your current capability and maturity with respect to Incident Response. Our reviews are highly adaptable and can include more practical aspects such as evaluation of technical capability in key areas of Incident Response.

At the conclusion we'll provide suggestions for actionable improvements based on a framework of observations, findings and recommendations through reporting or presentation.

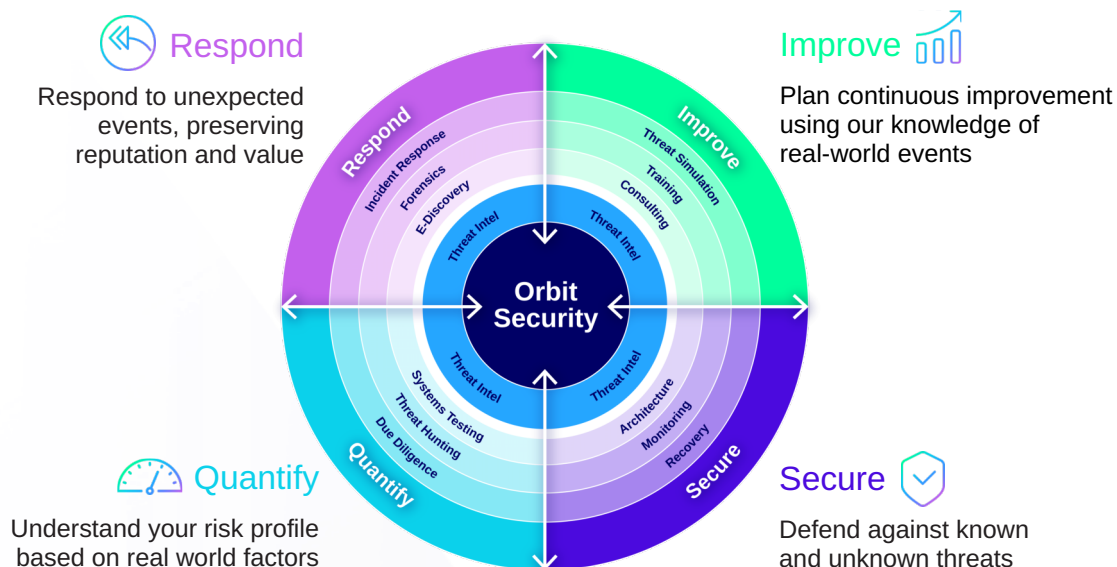

## Cyber Crisis Tabletop Exercise

Our experts will deliver theory driven exercises to stress-test your response to a range of crises, from ransomware to Insider threat and more.

Our experts' experience means that our scenarios are based on real-world events from the bleeding edge of incident response. We apply those lessons in a safe and controlled environment.

Deliverables can include reports covering observations and recommendations for your teams to implement in securing your business and clients.

**Our Incident Readiness Pack provides a discount when compared to contracting our individual services. Contact your relationship manager for the latest pricing.**
